# - Mgt Lazy Image Loader for Magento -
Installation & Usage

By: mgt-commerce.com

Congratulations on your purchase and thank you for your confidence in our company!

You have chosen an innovative product of high quality standard, that guarantees the best possible user experience for your online store. Thousands of customers benefit from our software every day. We hope you are as satisfied with your product. Before you begin installing, please read carefully the following instructions and back-up your server. Do you have questions about your product or problems with the installation, we are happy to help.

We hope you enjoy German engineering and - of course - wish you maximum success!

Your MGT-Commerce Team

Installation

1. Extract zip archive and copy contents to the app/folder of your Magento installation
2. Open the file "app/design/frontend/default/default/catalog/product/list.phtml"

 search for

```
 <img src="<?php echo $this->helper('catalog/image')->init($_product, 'small_image')->resize(135); ?>"
 width="135" height="135" alt="<?php echo $this->stripTags($this->getImageLabel($_product, 'small_image'), null, true) ?>" />
```

replace with

```
<img class="lazy" long-desc="<?php echo $this->helper('catalog/image')->init($_product, 'small_image')->resize(135); ?>"
src="<?php echo $this->getSkinUrl('images/lazy_image_loader/loader.gif'); ?>"  alt="<?php echo $this->stripTags($this->getImageLabel($_product, 'small_image'), null, true) ?>" />
```

3. Clear the cache in Admin > System > Cache Management
